DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1, 10, 17 and 22 are rejected under 35 U.S.C. 102(a) as being anticipated by Hiramatsu (JP-10335830).

Hiramatsu disclose producing thin film active electronics on separate carrier substrates (30A/30B); and combining said substrates using anisotropic electrical conductor (34A) (Abstract); wherein the thin film active electronics are produced continuously on separate carrier substrates; wherein the bonding layer is the conductor.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 2-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hiramatsu as applied to claims 1, 10, 17 and 22 above, and further in view of Kondo et al. (5,409,798).

Application/Control Number: 09/647,193

Art Unit: 2823

Hiramatsu does not disclose that one of the substrates is one of a flexible foil, a rigid plate, a plastic, a glass and a metal.

Kondo et al. disclose that the substrate (1) may be composed of any material like, a flexible foil, rigid plate, plastic, glass or metal (Col. 4, lines 19-36); depositing a base layer and a photosensitive layer.

It would have been within the scope of one of ordinary skill in the art to combine the teachings of to combine the teachings of Hiramatsu and Kondo et al. to enable formation of the substrates and further provides a choice of different substrate materials for possible reduction in manufacturing costs.

Claims 11-16 and 18-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hiramatsu in combination with Kondo et al. as applied to claims 2-9 above, and further in view of Smith et al. (5,944,537).

The combination of Hiramatsu and Kondo et al. does not disclose forming an organic light emitting diode or transistors on the substrate (Col. 5, lines 23-25 and Col. 12, lines 39-41).

It would have been within the scope of one of ordinary skill in the art to combine the teachings of to combine the teachings of Hiramatsu, Kondo et al. and Smith et al. to enable formation of the electronic circuit and also provides emission devices to the structure.

Application/Control Number: 09/647,193

Art Unit: 2823

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Michelle Estrada whose telephone number is (703) 308-

0729. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Olik Chaudhuri can be reached on 703-306-2794. The fax phone numbers

for the organization where this application or proceeding is assigned are 703-308-7722

for regular communications and 703-308-7724 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or

proceeding should be directed to the receptionist whose telephone number is 703-308-

0956.
